IMPACT

Remote-first leadership. Design-led growth.

I joined HashiCorp in January 2020 to **lead and grow a remote first, globally distributed design team** (US, Canada, UK, Germany) working on <u>Terraform</u>, the industry leading cloud infrastructure orchestration platform.

While the details of my current work at HashiCorp are confidential, I have published case studies about some of the challenges I've worked through and my impact on the organization through the <u>Plato</u> mentoring platform.

Introducing Design in the Roadmap Creation Process

How to Level Up Your Design Team

Even High Performers Need Direction and Support
